King's Law Journal
Call for Abstracts

Special Issue July 2019: *Environmental Justice and the Anthropocene*

Inspired by the 2018 King's Transnational Law Institute KTLS18 Summit, this forthcoming *King's Law Journal* Special Issue will unveil, explore, and interrogate different legal aspects of environmental justice including potential conflicts, unlikely alliances, and ways forward. The Special Issue is co-edited by Emily Barritt, Megan Bowman, and Leslie-Anne Duvic-Paoli of The Dickson Poon School of Law with support of the Climate Law & Governance centre, King's College London.

Consistent with the aspirations of KTLS18, the theme is intentionally broad to facilitate inclusion of a variety of perspectives and voices. *King's Law Journal* is a generalist journal and this Special Issue is intended to introduce its readership to the rich conceptual and practical challenges of achieving environmental justice in the Anthropocene. We welcome insightful, innovative or provocative submissions from experienced and also emerging contributors, which may focus on particular types of environmental justice such as climate, ecological, inter-species, inter-generational, race, gender, Global South, and Indigenous perspectives. Indicative topics that link legal thinking with environmental justice may include (but are not limited to):

- Theories and definitions, including critical legal theory discourses
- Legislation, litigation, advisory, accountability
- Legal education
- Artistic, aesthetics, or activist approaches
- Public participation and access to justice
- Technology, finance, the private sector and/or benefit-sharing

Deadline for Abstracts: 15 November 2018
- 500 word summary of paper;
- Whether the submission will be an Academic article (6-8000 words) or an Analysis piece (3-5000 words);
- 100 word short author bio.
Send to: emily.barritt@kcl.ac.uk and leslie-anne.duvic-paoli@kcl.ac.uk

The editorial team will select papers based on the Abstracts. The deadline for full submission of selected papers will be 1 March 2019.
